

Rodrigo Horvilleur Vallejos

Full-Stack Software Engineer · Node.js / FastAPI · React / Next.js · Docker & Linux

rodrixdere@gmail.com · +506 6026-1200 · Curridabat, San José, Costa Rica · rodrixdere.com · github.com/rodrixdere

Profile

Full-stack software engineer who ships and then operates what he builds: architecture, implementation, deployment and maintenance, including the Linux infrastructure underneath. Delivered a production platform serving 150 daily active users as sole engineer, in under 8 weeks against a 3-month estimate. Runs a self-hosted SaaS in production with a 65-test automated suite, and has published an open-source CLI on npm. Strongest on backend and DevOps (secure REST APIs, authentication and role-based access control, PostgreSQL, Docker, CI/CD) with polished React frontends. **English C1+** verbal and written, Spanish native. B.S. in Software Engineering completed. Available immediately.

Technical Skills

- **Languages:** JavaScript (ES6+) · TypeScript · Python · PHP · SQL · Java · C++ · HTML5 · CSS3
- **Backend:** Node.js · Express · FastAPI · RESTful API design · JWT · NextAuth · OAuth · RBAC · bcrypt
- **Frontend:** React · Next.js · Vite · Tailwind CSS · GSAP · responsive design
- **Data:** PostgreSQL · MySQL · Supabase · MongoDB · relational modelling · migrations · audit trails
- **DevOps & infra:** Docker · Linux server administration · Coolify · Cloudflare · Vercel · Railway · Git / GitHub · CI/CD
- **Practices:** Agile / Scrum · automated testing (Jest, PHPUnit) · code review via pull requests · Jira · technical documentation

Experience

Full-Stack Software Engineer · Fundación Curridabat

Jan 2026 – Mar 2026

- Delivered a production-ready platform in under 8 weeks against a 3-month estimate, as sole engineer: 150 daily active users, 3 user roles, zero critical failures since launch.
- Designed the data model and a secure REST API with JWT authentication and role-based access control. Stack: React + Vite + Tailwind, Node.js + Express, PostgreSQL + Supabase, deployed on Vercel and Railway.
- Released incrementally and gathered feedback from non-technical users each cycle.

Frontend Engineer · George Angulo Fitness

Aug 2025 – Dec 2025

- Built and shipped a multi-page brand website with interactive map and transactional email integration; delivered complete technical documentation for client handoff.

Projects

Cabinance · Personal-finance SaaS, in production

cabinance.app

- Solo-built and operated: Next.js frontend, Python/FastAPI backend over PostgreSQL, NextAuth with Google sign-in and mandatory email verification, gamification and automated insights computed from user financial data.
- 65 automated tests. Dockerized deployment on a self-managed Linux VPS (Hetzner) with Coolify, behind Cloudflare, with hands-on ownership of logging and monitoring in production.

Expense Management System · WorldCom de Costa Rica

PHP · MySQL · Docker

- Internal web system for corporate expense reports with a five-role approval workflow: submitter, area manager, approver, administrator and read-only viewer.
- 11-table relational model with full status history for auditability, configurable rates, PDF export of approved reports and automated email notifications. Functional test suite in PHPUnit.

DocWizard · Open-source CLI published on npm

npmjs.com/package/docwizard

- Node.js and TypeScript CLI that scans a project's source code and generates a plain-language end-user guide via the Groq API.

Education

B.S. in Software Engineering · Universidad Latina de Costa Rica

2021 – 2026

Degree approved, diploma in process · English C1+ (advanced, verbal and written)

AWS Academy Cloud Foundations · preparing for AWS Cloud Practitioner certification

2026 – in progress
